SUMMARY

First-Class Honors Software Engineering graduate with hands-on experience building government digital solutions at the Ministry of Hajj and Umrah and an AI-powered cross-platform mobile application. Skilled in front-end development with React and Flutter, translating business and user requirements into accessible, bilingual, user-centered software.

PROFESSIONAL EXPERIENCE

Ministry of Hajj and Umrah Aug 2025 – Dec 2025

Software Engineering Specialist | Cooperative Training | Internal Portal Development

- Co-led the analysis and redesign of the Ministry's internal employee portal as one of a two-person Agile team, restructuring its information architecture, digital services, and employee workflows.
- Developed the front-end implementation of redesigned portal interfaces in React, aligned with the Ministry's visual identity and Digital Government Authority (DGA) UX and accessibility guidelines.
- Built event and calendar modules in React to streamline internal scheduling and operations.
- Delivered fully bilingual (Arabic/English) responsive interfaces with RTL/LTR support across key portal pages.
- Designed and developed the user interface for an AI assistant feature, giving employees faster access to internal information and services.

PROJECTS

Athar | Graduation Project May 2026

AI-Powered Bilingual Mobile Application for Saudi Cultural Heritage and Tourism

Flutter, Dart, Riverpod, Firebase, Google Gemini API

- Developed the front-end of a bilingual (Arabic/English) cross-platform mobile app as part of an Agile team, using Flutter, Dart, and Riverpod state management with real-time Firestore streams.
- Integrated Firebase Authentication, Cloud Firestore, and Cloud Storage to support multiple user roles (tourist, guide, admin, guest) with secure, real-time data access.

Tic Tac Toe | Java & Design Patterns Project May 2025

- Built a desktop game with single-player (vs. AI) and two-player modes, applying the Strategy pattern for Easy/Medium/Hard AI levels and the Factory pattern for dynamic player creation within an MVC architecture.

Hotel Management System | Database Project May 2024

- Designed a normalized MySQL database for hotel bookings and service evaluation, modeled with Chen and UML ER diagrams and queried with advanced SQL (JOINs, subqueries, GROUP BY).

EDUCATION

Umm Al-Qura University | College of Computing | Makkah, Saudi Arabia 2026

Bachelor of Software Engineering, First-Class Honors

TRAINING & CERTIFICATIONS

Software Testing & Automation Bootcamp | Tuwaiq Academy Nov 2026 – Dec 2026 (Expected)

Intensive bootcamp in software testing for web and mobile applications, covering test planning, defect analysis, and test automation tools, with a capstone project.

TECHNICAL SKILLS

Programming Languages: Dart, Java, JavaScript, SQL

Frameworks & Technologies: Flutter, Riverpod, React, HTML, CSS, Java Swing

Cloud & Databases: Firebase (Authentication, Cloud Firestore, Cloud Storage), MySQL

Software Engineering: Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), System Analysis, Requirements Engineering, MVC, Design Patterns, UML, BPMN, ERD, Agile Methodologies

Front-End & Mobile Development: Responsive UI Development, Cross-Platform Mobile Development, Accessibility, UI Component Design

Tools: Git, GitHub, Figma, Android Studio, Visual Studio Code

LANGUAGES

Arabic (Native), English (Advanced)
